

CS1003 Homework IV

This homework will be marked out of 10.

Please write your **NAME** and **CS1003** on the top of the first page.
Submit your solution online via the CS1003 page on mymodule.tcd.ie. Your assignment should be submitted by **8pm on Friday, 9th November**.

Q1 (3 marks)

What is the linear Taylor polynomial about $\frac{\pi}{3}$ for the function $g(x) = \tan x$?

Q2 (3 marks)

What is the coefficient of $(x - \pi)^3$ in the quintic Taylor polynomial about $x = \pi$ for the function $f(x) = \sin(2x)$?

Q3 (4 marks)

What is the coefficient of $(x + 3)^3$ in the quintic Taylor polynomial about -3 for the function $h(x) = (x + 1)^{-2}$?

Note: To obtain full marks you will need to lay your work out in clear logical steps so that the reader can see exactly how you obtain one line from the previous one. You should show all your workings clearly, in particular please use equal signs where appropriate. Don't be afraid to use sentences in English to help explain what you are doing and why.

Homework Submission: Submit your work as a **SINGLE PDF FILE**. Please submit handwritten work that you have scanned or taken photos of. Remember to combine your scanned files into a single pdf if necessary. Typeset work (e.g. that created using LaTeX or Microsoft Word with equation editor) will only be allowed in exceptional circumstances – please email Meriel.Huggard@tcd.ie to obtain permission to typeset your work.
